

T-PRO HYBRID 3.5 LITE

The Cost-Effective Universal Sensor

TECH's Hybrid 3.5 Lite sensors are affordable, purely programmable TPMS sensors designed for an optimal fit with OE and aftermarket wheels.

Compatible with diagnostic tools from leading manufacturers, Hybrid Lite sensors can be programmed with new protocols in a snap, making it one of the fastest programmable sensors available on the market.

- Compatible with leading diagnostic tools, including those manufactured by ATEQ.
- The same parallel valve fitment as Schrader OE sensors.
- 433 MHz frequency transmission required for EU TPMS systems.
- Long-lasting, powerful Maxell battery.
- Next generation NXP chip for unparalleled performance.
- 3-year sensor and 2-year valve warranty.
- Available with black, silver or graphite Clamp-in valves to meet your customer's needs.
- Alloy wheel valve protector to prevent damage to your alloy wheels.
- Low 0.04kg sensor weight for more balanced wheels.

Valve Options

- Silver Clamp-In: 72-23-002
- Black Clamp-In: 72-23-004
- Graphite Clamp-In: 72-23-005
- Snap-In: 72-23-003
