

THE 6-STEP TPMS PROCEDURE

INSPECT

Check the vehicle to determine what may be required.

1

DISCUSS

Talk to the customer about the current situation.

3

TEST

Do a second test with a TPMS diagnostic tool to ensure the system is working correctly.

5

TEST

Test the sensors using a TPMS diagnostic tool to confirm what action is needed.

2

REPAIR/SERVICE

Perform any required work.

4

RECORD

Print or save service data for the customer's record.

6
